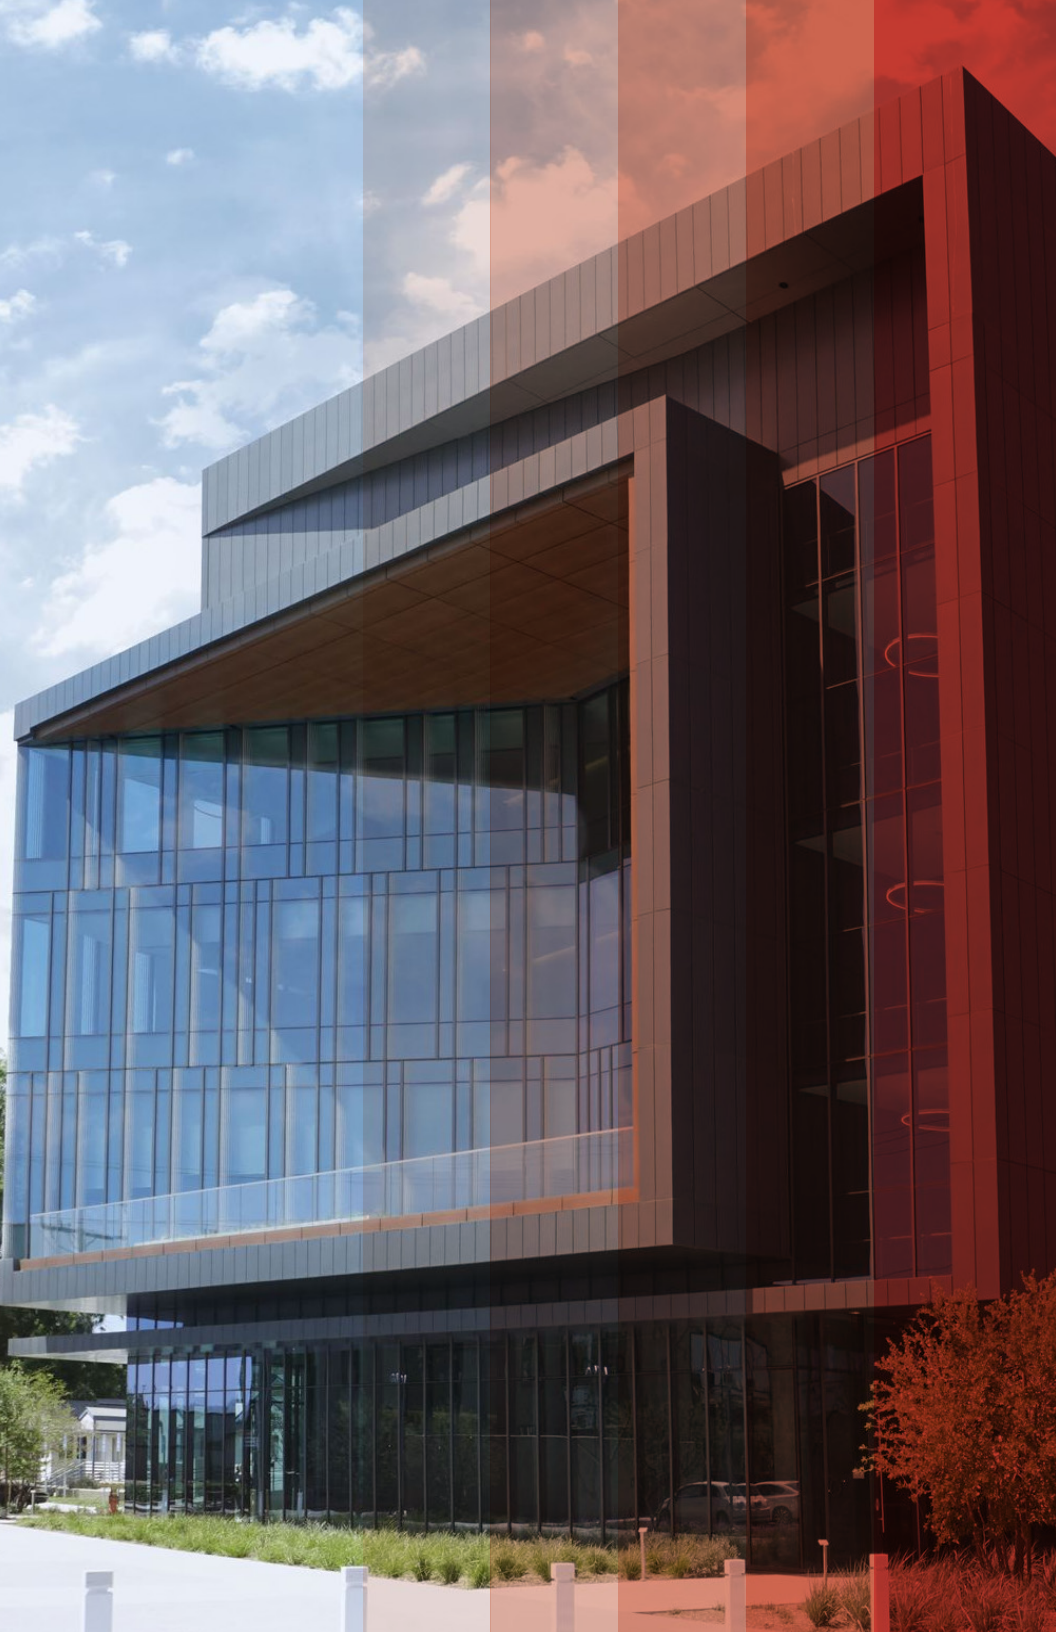
Our Goal

To create an ideal community in which to launch a small company, surrounding members with the best people, infrastructure, and resources to accelerate scientific achievement.

Locations:

- Los Angeles
- Boston
- Cambridge
- New York
- North Carolina
- San Francisco
- San Diego
- Princeton
- Philadelphia



Why choose BioLabs?

BioLabs are the premier co-working spaces for life science startups — unique places where you can test, develop, and grow your game-changing ideas. Our success in building facilities throughout the United States has given us the insights to the best practices when it comes to helping early-stage companies get of the ground. As entrepreneurs ourselves, we have been through this multiple times and know the pain-points start-ups face.

"Empowering awesome-One bench at a time

ABOUT BIOLABS

$1B Raised

Our members collectively raised more than $1 billion in private financing

230 Companies

Since 2009, we have helped the formation or launch of over 230 companies

800 Jobs

Our member-launched companies have created over 800 jobs

Supporting the Local Biotech Ecosystem

BioLabs is designed to help high-potential life-science startups go further and grow. Los Angeles is becoming a growing bio-science cluster with world renowned hospitals, research institutions, and universities including The Lundquist Insitute (Formerly LA BioMed), UCLA, USC, Caltech and more! There is no better place to be than at the center of this growing biotech environment.

** Alll data coming from Biocom's 2019 California Economic Impact Report*
